What is "Hosted Email"?

Hosted email means that our servers handle your email while we maintain all of the software, hardware and upgrades. As your email host, our responsibilities include around the clock support, top-notch security, and a 99.9% uptime guarantee which is crucial for your business. Because email is our business, we offer special features that range from server-side anti-virus to multi-lingual brandable Web mail interfaces. Last, hosting your email with EzMail enables you to receive the most professional, private email service without any of the expense.

Even though we host your email, everything remains @your-domain!

The solution that works for both small & large organizations:

We have proven time and time again that both small and large businesses benefit from hosting their email with EzMail. Simply put, we cut your costs and often exceed the level of performance of your previous system or provider. Our customers have from 1 mailbox to thousands.

We provide an easy and complete hosted solution bundled into one package. You do not need to buy hardware, software and licenses or deal with maintenance, upgrades and any other issues involved in running an email system suitable for businesses.

EzMail.biz is a great alternative to:

- free mail, which is not suitable for business use and does not guarantee business level service or support
- in-house email servers that are costly and unreliable
- email services from your ISP/hosting company which are costly, not meticulously maintained, and lack the crucial features required for your business.

EzMail is affordable:

We provide your business with a reliable, fixed cost solution priced by the mailbox.

Set-up in a snap:

Be operable within as little as 1 business day with no technical experience necessary! We work with you every step up of the way.

Compare:

Compare EzMail.biz with the competition and you'll see we come out on top every time! In fact, if you are not satisfied with our service within the first 30 days, we will refund your money.

Our Resume:

We have been a dependable email service provider since 1999. While 80% of the businesses we provide email for are inside the US, we have satisfied customers on 6 continents. We power our email on powerful proprietary technology that is carrier scale. We are not like the others that use limited off the shelf software.
